Adeline Lefebvre

Freelance Fullstack Developer · From custom sites to AI apps

Next.js · React · TypeScript · WordPress · Craft CMS · AI (Claude, Mistral)

Profile

I turn business needs into products that ship: from custom websites (WordPress, Craft CMS) to AI-powered apps (Next.js, Claude, Mistral), with long-term maintenance. Product background (Station F) and 4+ years building production software used by real people across 6 countries.

Experience

Freelance Fullstack Developer

Jan 2026 - Present

Custom web development & long-term maintenance for agencies and businesses across Europe.

- **LIME Search (NL)** · Craft CMS recruitment platform: private interim job board on the OTYS integration, custom Twig/PHP, ongoing maintenance.
- **Velec Systems (FR)** · Performance, responsive adaptation (47 pages) and technical SEO on a trilingual WordPress multisite.
- **IN CULTURE, for Code Create (NL)** · Next.js + Sanity brand site, developed solo from the agency's design.
- **Revier, Club Fifty Five, Lipology Clinic, for Code Create (NL)** · WordPress / Elementor Pro builds and a 400-page migration, from the agency's designs.

Rootyne · Founder & Developer

Jan 2026 - Present

AI health platform: personalized blood-test analysis. Full-stack **Next.js + Firebase + GraphQL**. AI extraction pipeline (**Claude + Mistral**) with an anonymization layer, biologist validation dashboard, HDS-compliant encrypted infrastructure, Stripe payments.

Bulbus · Founder & Developer

Feb 2025 - Present

Cross-platform **Flutter** app for herbalism students. 150+ plants, timed mock exams, in-app purchases. Live on iOS & Android with 200+ downloads and 37 paying users; in B2B talks with herbalism schools.

Desert Leaves (ES) · Software Engineer

Mar 2025 - Nov 2025

Erasmus for Young Entrepreneurs. Built a multilingual platform from scratch for a reforestation NGO: **Next.js** + headless **Prismic** CMS, Stripe donations, transactional email, multilingual SEO, Google Workspace migration & Google Ads.

Rural Hackers (ES) · AR Software Engineer

Aug 2024 - Sep 2024

Tech residency. Marker-based augmented-reality mystery game: **A-Frame, MindAR**, 3D character generation, real-time interactions (Pusher), non-linear storytelling.

Cubyn · Software Engineer

May 2022 - Sep 2023

E-commerce logistics scale-up. Contributed to a large-scale **microservices architecture (80+ services)** on **Kubernetes / GCP**. Backend in **Node.js / TypeScript** (MySQL, RabbitMQ, Elasticsearch), frontend in Vue.js, CI/CD on CircleCI, testing with Jest.

Klox · Software Engineer

Sep 2021 - Mar 2022

Fullstack **SaaS platform**: **React / Next.js** frontend, Node.js backend, **GraphQL** (Apollo) with TypeORM/PostgreSQL. Integrated HubSpot, Stripe, Pennylane, Google Cloud. Built user & admin dashboards; contributed to architecture and code reviews.

Station F · Entrepreneur & Product Designer

Oct 2020 - Apr 2021

Pépité Île-de-France acceleration. Early-stage marketplace for French artisans: market research, product requirements, **UX/UI** prototypes (**Figma**), lean product methodology. This is where my passion for development began.
